### Background

The Governor's Executive Order B-16-2012 sets a long-term target of reaching 1.5 million ZEVs on California's roadways by 2025 and infrastructure to support 1 million ZEVs by 2020. The Energy Commission is helping California prepare for the deployment of plug-in electric vehicles and fuel cell electric vehicles by providing funding for electric vehicle supply equipment (EVSE) and hydrogen fueling stations. It has also provided funding for regional planning through previous solicitations (PON-10-602 and the current PON-13-603) as well as funding for a statewide permitting ombudsman in the Governor's Office of Economic and Business Development (GO-Biz).

In order to help California's regions implement existing ZEV plans and efforts, the Energy Commission is considering a solicitation that would fund a variety of implementation activities. These activities and the questions posed to workshop

attendees are located at the following link: [www.energy.ca.gov/2013-ALT-01/documents/index.html](http://www.energy.ca.gov/2013-ALT-01/documents/index.html).

This workshop will provide an opportunity for stakeholders to provide input to the development of the solicitation and additional activities for the Energy Commission to consider.
